PREFACE

Brand's Profile

Welcome to the world of

SWETON[®]
KOLKATA

The horizon where Four decades of experience meet futuristic ideas
Established in the year 1982, SWETON is one of the pioneer brands of India recognized as the market leader in India.

- SWETON symbolizes elegance, style and superior craftsmanship where each and every product is finest in technical superiority and aesthetic sophistication.
- SWETON believes in regular upgradation and development and a dedicated R&D Team works continuously with precision software and equipment.
- SWETON-Among the very few Indian Brands having an in-house wide variety of products of precision transducers for professional sound industries.
- Manufactured at the modern plant in Kolkata, every SWETON Product undergoes rigorous Quality Control test with many state of the art software and equipment to ensure trouble free long life.
- SWETON products are best in quality at an affordable price.

The image features a dark teal background with a pattern of concentric circles. A white rectangular border is centered on the page, enclosing an orange rectangular box. Inside the orange box, the words "FULL RANGE" are written in white, bold, uppercase letters. A vertical light beige bar is positioned on the left side of the image.

The image features a dark teal background with a pattern of concentric, slightly irregular circles. A vertical light beige bar is positioned on the left side. In the center, there is a white rectangular border containing an orange rectangle. Inside the orange rectangle, the word "TWEETER" is written in white, bold, uppercase letters.

TEST STANDARDS

- Nominal Power Handling is measured according to the AES2-1984 standard.
- Power on Continuous Program is defined as 3 dB greater than the Nominal Rating.
- Applied RMS Voltage is set to 2.83 V for 8 ohms Nominal Impedance
- Thiele-Small (T/S) parameters are measured after a high level 25 Hz sine wave preconditioning test for 4-8 hours.
- Linear X-max is measured by Mechanical excursion.
- Frequency Response and Impedance Curve are measured using MLS and Sinusoidal feature in auto scaling function of CLIO 12.5 Standard version.
